

**...because children don't
come with instructions.**

Dear Parents,

You are the ***most important*** ingredient in your child's health and school success. It is challenging to feed, discipline, set family routines, teach values, manage conflict, help children learn, and get involved in school.

We are very excited to have **Teaching Important Parenting Skills: TIPS for Great Kids** in our program! **TIPS** brings you parent information on topics you want when you want.

There are around 300 parent tip cards covering a variety of parenting topics such as:

Bedtime Routines
Biting
Crying

Play
Ringworm
Spoiling Babies

Spanking
Toilet Training
Well-Child Care

TIPS for Great Kids is designed to meet your needs or concerns. After all, you know your child best!

We encourage you to ask your child's teacher about any parenting topic that you may be interested in, or may need some help with. We have a list of all the parent tip cards and would be glad to provide you with a copy.

Again, we are very excited about TIPS for Great Kids! We hope you are too! If you have any questions regarding this program, please ask any staff member.

Sincerely,

Have a question? Ask your child's teacher.
