

**...because children don't  
come with instructions.**

**Dear Parents,**

You are the ***most important*** ingredient in your child's health and school success. It is challenging to feed, discipline, set family routines, teach values, manage conflict, help children learn, and get involved in school.

I am very excited to have **Teaching Important Parenting Skills: TIPS for Great Kids** in my classroom! **TIPS** brings you parent information on topics you want when you want.

There are around 300 parent tip cards covering a variety of parenting topics such as:

**Bedtime Routines**  
**Biting**  
**Crying**

**Play**  
**Ringworm**  
**Spoiling Babies**

**Spanking**  
**Toilet Training**  
**Well-Child Care**

TIPS for Great Kids is designed to meet your needs or concerns. After all, you know your child best!

I encourage you to ask me about any parenting topic that you may be interested in, or may need some help with. I have a list of all the parent tip cards and would be glad to provide you with a copy.

Again, I am very excited about TIPS for Great Kids! I hope you are too! If you have any questions regarding this program, please ask me.

Sincerely,

**Have a question? Ask your child's teacher.**
